달의 내린 산기슭

Son Jang-Won

#021

Crumble

Why are the rocks like this?

It is because two big fossils are joined together.

We can't get a fossil like this!
Usually they exists 1meter in place. We find 3 more in my pictures.

There is only one place like this where Do Sung-ah's mum can be seen clearly.

So there should be a fossil here. Now which I can identify the normal property
You should work hard. I'm going to my area. I'll bring the car in the evening to pick you up.

Ah right. This is your mom not? Don't mind, and spend for your lunch. I will have your portion here.
Ah...

Don't know there here. Hurry no worrying by sorry. Keep it for now and I'll treat you dummy lunch.
Ah? Isn't it too hard to walk all the way there?

Your area is better for lunch. It has shade. We can eat together at around one o'clock

... Yeah. Sure.

See you later!
Ah

Let's see...

Clang

Appear

You came again today, too. You foolish human!

Dr. Appear

Dr. Come close

But why have you been tripping the same spot for days?

That's the boundary of the structure which I encountered.

Under here is Se Story structure.
And from there is you. Hwa Jeol structure.

If you're a agent of Hwa Jeol structure you should know your area

I never cared about it before. I have a good relationship with Se Story structure too

Does the agent of Se Story structure even come out anymore?

Ah she's the type who doesn't appear often

Hm... mystery of 1 hwal 9 souls term 1 cra find out where the 9 souls are begin and ends so it is important

Why is that structure?
It is my research topic

Err... then are you going to come tomorrow, too?

Ah tomorrow... Are you going to be here too?
Yeah I'm always here...

Okay.
Okay

Appear
Se Song, he left.

.....

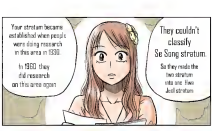
Shi Yun

"Looking for stratum section which you can do research on

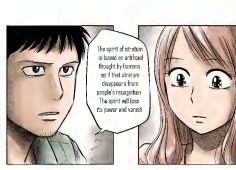
It's my research topic. How can I not know?
Sin Tra

What is that?

The data about Se Song stratum and Hwa Jeol stratum which I gathered for thirty years



Your stratum became established when people were doing research in this area in 1938.
In 1960, they did research on this area again.
They couldn't classify Se Song stratum.
So they made the two stratum into one. Hwa Jeol stratum



The spirit of stratum is based on artifact thought by humans so if that stratum disappears from people's recognition The spirit will lose its power and variety

She has been treated for 30 years like she's not there, so she must not have much power left

Recently, people are trusting Se Song stratum as a separate stratum, so she must not have disappeared yet
To make people recognize her better, we need more data

I dissolved all the rocks, so if I find the fossils which can help identify the period better I can write a thesis and separate Se Song stratum from Hwa Jeol stratum

Ah...

I don't know what you are saying, but..
Thank you.

Your boyfriend is a kleptomaniac so you won't know about many things. Goodness!
Shocked

And you shouldn't thank me. This is going to make your area half as big.

Also, I'll make sure Se Song spirit shows her face. She's my research topic, but I haven't seen her at all. I want to see what she looks like.

That would be good. Se Song is a pretty spirit.
Hahaha

Ah, is she pretty?

Ah. Se Song is grounded not beautiful. She is the second most pretty woman in the world. I expect here. She was a model my senses through

Then I don't need to see her.

This is what humans should do anyway
decided that this monarch is going to take 3 weeks so I will show the world my achievements in that time!
